## Project

### Electricity Bill Record App

This app allows you to view and add electricity bill records. You can add a bill by entering the details in the form and clicking the Save button. You can also edit the bill records. The app is deployed using GitHub Vercel and Heroku.

### Notes Taking app

A web app that allows you to create notes and save them to a database. You can also search through all of your notes and find the one you want. You have to log in to access the app. The app is deployed using GitHub Vercel and Heroku.

### Portfolio

This is my personal portfolio website. You can see my projects and resume here. You can also contact me here. It is built using ReactJS and Tailwind CSS. It is hosted on GitHub Pages.

## Achievements

I learned to build websites on my own. I was drawn to the field of web development because of my interest in learning about new IT technologies.
